

	Year 1	Year 2	Year 3
Number: Number and Place Value	read and write numbers from 1 to 20 in numerals and words.	read and write numbers to at least 100 in numerals and in words	read and write numbers up to 1000 in numerals and in words
		recognise the place value of each digit in a two-digit number (tens, ones)	recognise the place value of each digit in a three-digit number (hundreds, tens, ones)
	identify and represent numbers using objects and pictorial representations including the number line	identify, represent and estimate numbers using different representations, including the number line	identify, represent and estimate numbers using different representations
	count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number	count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward	count from 0 in multiples of 4, 8, 50 and 100;
	count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens		
	given a number, identify one more and one less		find 10 or 100 more or less than a given number
	use the language of: equal to, more than, less than (fewer), most, least	compare and order numbers from 0 up to 100; use <, > and = signs	compare and order numbers up to 1000
	use place value and number facts to solve problems	solve number problems and practical problems involving these ideas	

	Year 1	Year 2	Year 3
Number: Addition and Subtraction	represent and use number bonds and related subtraction facts within 20	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100	
	add and subtract one-digit and two-digit numbers to 20, including zero	add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> - a two-digit number and ones - a two-digit number and tens - two two-digit numbers - adding three one-digit numbers 	add and subtract numbers mentally, including: <ul style="list-style-type: none"> - a three-digit number and ones - a three-digit number and tens - a three-digit number and hundreds
	read, write and interpret mathematical statements involving addition (+), subtraction (−) and equals (=) signs		
		show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot	
	solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$	solve problems with addition and subtraction: <ul style="list-style-type: none"> - using concrete objects and pictorial representations, including those involving numbers, quantities and measures - applying their increasing knowledge of 	solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction
		recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	estimate the answer to a calculation and use inverse operations to check answers
	Year 1	Year 2	Year 3

Number:
Multiplication
and Division

	recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even	recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables
	calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals (=) signs	write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods
	show that multiplication of two numbers can be done in any order (commutative) and division of one number by another	
solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher	solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects

Fractions,
Decimals and
Percentages

		recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred'
	recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$	recognise and show, using diagrams, equivalent fractions with small denominators

		solve problems that involve all of the above
Year 1	Year 2	Year 3
sequence events in chronological order using language [for example, before and after, next, first, today, yesterday, tomorrow, morning, afternoon and	compare and sequence intervals of time	tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks
recognise and use language relating to dates, including days of the week, weeks, months and years	tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show	know the number of seconds in a minute and the number of days in each month, year and leap year
tell the time to the hour and half past the hour and draw the hands on a clock face to show these times	know the number of minutes in an hour and the number of hours in a day.	compare durations of events [for example to calculate the time taken by particular events or tasks]
		estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight
recognise and know the value of different denominations of coins and notes	recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value	add and subtract amounts of money to give change, using both £ and p in practical contexts
	find different combinations of coins that equal the same amounts of money	
	solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving	

Measurement

<p>compare, describe and solve practical problems for:</p> <ul style="list-style-type: none"> - lengths and heights [for example, long/short, longer/shorter, tall/short, double/half] - mass/weight [for example, heavy/light, heavier than, lighter than] - capacity and volume [for example, full/empty, more than, less than, half, half full, quarter] - time [for example, quicker, slower, earlier] 	<p>choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels</p>	<p>measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)</p>
<p>measure and begin to record the following:</p> <ul style="list-style-type: none"> - lengths and heights - mass/weight - capacity and volume - time (hours, minutes, seconds) 		
		<p>measure the perimeter of simple 2-D shapes</p>

	Year 1	Year 2	Year 3
Geometry: Properties of Shapes	recognise and name common 2-D and 3-D shapes, including: - 2-D shapes [for example, rectangles (including squares), circles and triangles] - 3-D shapes [for example, cuboids (including cubes), pyramids and spheres]	identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line	identify horizontal and vertical lines and pairs of perpendicular and parallel lines
		identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces	
		identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]	draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and
		compare and sort common 2-D and 3-D shapes and everyday objects	
			recognise angles as a property of shape or a description of a turn

			identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle
Geometry: Position and Direction	Year 1	Year 2	Year 3
	describe position, direction and movement, including whole, half, quarter and three-quarter turns	use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-	
Statistics	Year 1	Year 2	Year 3
		ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity	solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and
		ask and answer questions about totalling and comparing categorical data	
		interpret and construct simple pictograms, tally charts, block diagrams and simple tables	interpret and present data using bar charts, pictograms and tables
	Year 1	Year 2	Year 3

Algebra	<i>solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$</i> <i>(Number: Addition & Subtraction)</i>	<i>recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems</i> <i>(Number: Addition & Subtraction)</i>	<i>solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction</i> <i>(Number: Addition & Subtraction)</i>
			<i>Solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects</i> <i>(Number: Multiplication & Division)</i>
		<i>recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100</i> <i>(Number: Addition & Subtraction)</i>	
	<i>represent and use number bonds and related subtraction facts within 20</i> <i>(Number: Addition & Subtraction)</i>		
Ratio and Proportion	Year 1	Year 2	Year 3
	32	44	45

Year 4	Year 5	Year 6
read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit
identify, represent and estimate numbers using different representations	read Roman numerals to 1000 (M) and recognise years written in Roman numerals	
count in multiples of 6, 7, 9, 25 and 1000	count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000	use negative numbers in context, and calculate intervals across zero
find 1000 more or less than a given number		
count backwards through zero to include negative numbers	interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero	
order and compare numbers beyond 1000	round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000	round any whole number to a required degree of accuracy
round any number to the nearest 10, 100 or 1000		
solve number and practical problems that involve all of the above and with increasingly large positive numbers	solve number problems and practical problems that involve all of the above	solve number and practical problems that involve all of the above

Year 4	Year 5	Year 6
	add and subtract numbers mentally with increasingly large numbers	perform mental calculations, including with mixed operations and large numbers
add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)
solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	solve problems involving addition, subtraction, multiplication and division
		solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
estimate and use inverse operations to check answers to a calculation	use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy
Year 4	Year 5	Year 6

recall multiplication and division facts for multiplication tables up to 12×12	multiply and divide numbers mentally drawing upon known facts	perform mental calculations, including with mixed operations and large numbers
use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers	multiply and divide whole numbers and those involving decimals by 10, 100 and 1000	
multiply two-digit and three-digit numbers by a one-digit number using formal written layout	multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers	multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication
	divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context	divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context
solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects	solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign	solve problems involving addition, subtraction, multiplication and division
	solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes	

	solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates	
		use their knowledge of the order of operations to carry out calculations involving the four operations
		use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy
recognise and use factor pairs and commutativity in mental calculations	identify multiples and factors, including finding all factor pairs of a number, and common factors of	identify common factors, common multiples and prime numbers
	know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers	
	establish whether a number up to 100 is prime and recall prime numbers up to 19	
	recognise and use square numbers and cube numbers, and the notation for squared (²) and	
Year 4	Year 5	Year 6
count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten	compare and order fractions whose denominators are all multiples of the same number	compare and order fractions, including fractions > 1
	recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example, $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1 \frac{1}{5}$	
		use common factors to simplify fractions; use common multiples to express fractions in the same
add and subtract fractions with the same denominator	add and subtract fractions with the same denominator and denominators that are multiples of the same number	add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions

solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole		
	multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams	multiply simple pairs of proper fractions, writing the answer in its simplest form [for example, $1/4 \times 1/2 = 1/8$]
		divide proper fractions by whole numbers [for example, $1/3 \div 2 = 1/6$]
round decimals with one decimal place to the nearest whole number	round decimals with two decimal places to the nearest whole number and to one decimal place	solve problems which require answers to be rounded to specified degrees of accuracy
compare numbers with the same number of decimal places up to two decimal places	read, write, order and compare numbers with up to three decimal places	
identifying the value of the digits in the answer as ones, tenths and hundredths		identify the value of each digit in numbers given to three decimal places
find the effect of dividing a one- or two-digit number by 10 and 100,		multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places
		multiply one-digit numbers with up to two decimal places by whole numbers
		use written division methods in cases where the answer has up to two decimal places
recognise and show, using diagrams, families of common equivalent fractions	identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths	use common factors to simplify fractions; use common multiples to express fractions in the same denomination
recognise and write decimal equivalents of any number of tenths or hundredths	read and write decimal numbers as fractions [for example, $0.71 = 71/100$]	associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction [for example, $3/8$]
recognise and write decimal equivalents to $1/4, 1/2, 3/4$	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	

	write percentages as a fraction with denominator 100, and as a decimal	recall and use equivalences between simple fractions, decimals and percentages, including in different contexts
	solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{4}{5}$ and those fractions with a denominator of a	
solve simple measure and money problems involving fractions and decimals to two decimal places	solve problems involving number up to three decimal places	
Year 4	Year 5	Year 6
read, write and convert time between analogue and digital 12- and 24-hour clocks		
solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days		
estimate, compare and calculate different measures, including money in pounds and pence		

		solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate
Convert between different units of measure [for example, kilometre to metre; hour to minute]	convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)	use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places
	understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints	convert between miles and kilometres
	use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling	
measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres	measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres	recognise that shapes with the same areas can have different perimeters and vice versa
find the area of rectilinear shapes by counting squares	calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm ²) and square metres(m ²) and estimate the area of irregular	calculate the area of parallelograms and triangles

		recognise when it is possible to use formulae for area and volume of shapes
	estimate volume [for example, using 1 cm ³ blocks to build cuboids (including cubes)] and capacity [for example, using water]	calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm ³) and cubic metres (m ³), and extending to other units [for example, mm ³ and
	solve problems involving converting between units of time	
	use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling	
Year 4	Year 5	Year 6
identify lines of symmetry in 2-D shapes presented in different orientations		draw 2-D shapes using given dimensions and angles
complete a simple symmetric figure with respect to a specific line of symmetry		illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius
	identify 3-D shapes, including cubes and other cuboids, from 2-D representations	recognise, describe and build simple 3-D shapes, including making nets
compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes	use the properties of rectangles to deduce related facts and find missing lengths and angles	compare and classify geometric shapes based on their properties and sizes
	distinguish between regular and irregular polygons based on reasoning about equal sides and angles.	... and find unknown angles in any triangles, quadrilaterals, and regular polygons
identify acute and obtuse angles and compare and order angles up to two right	know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles	

	draw given angles, and measure them in degrees (o)	recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles
Year 4	Year 5	Year 6
describe positions on a 2-D grid as coordinates in the first quadrant		describe positions on the full coordinate grid (all four quadrants)
plot specified points and draw sides to complete a given polygon		
describe movements between positions as translations of a given unit to the left/right and up/down	identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed	draw and translate simple shapes on the coordinate plane, and reflect them in the axes
Year 4	Year 5	Year 6
solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs	complete, read and interpret information in tables, including timetables	
interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and	solve comparison, sum and difference problems using information presented in a line graph	interpret and construct pie charts and line graphs and use these to solve problems
		calculate and interpret the mean as an average
Year 4	Year 5	Year 6
	<i>Perimeter can be expressed algebraically as $2(a + b)$ where a and b are the dimensions in the same unit (Non-statutory guidance: Measurement)</i>	use simple formulae
	<i>recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3)</i>	generate and describe linear number sequences

		express missing number problems algebraically
		find pairs of numbers that satisfy an equation with two unknowns
		enumerate possibilities of combinations of two variables
Year 4	Year 5	Year 6
		solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts
		solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for
		solve problems involving similar shapes where the scale factor is known or can be found
		solve problems involving unequal sharing and grouping using knowledge of fractions and multiples
