Springfield Primary School

GDPR

Data Breach Policy and Procedures

Version: Pre CMAT Board approval – May 2018 v3

All references in this policy to the Trust applies to all CMAT operations including all schools and academies.

1 Introduction

- 1.1 The Trust understands the importance of keeping personal data secure and of effectively dealing with data breaches. This is essential for maintaining the trust of staff, pupils and their parents when the Trust uses their information.
- 1.2 This policy and procedure is to be used by the Trust in the event of a data breach at the Trust (or a suspected data breach).
- 1.3 All staff will receive training on how to recognise a data breach and the Trust's **Information Security Policy** contains guidance for staff on this issue.
- 1.4 The Trust is required to report certain breaches to the Information Commissioner's Office (ICO) and to data subjects under the General Data Protection Regulation (GDPR). There are strict timescales for reporting breaches which are outlined in section 7.
- 1.5 The Trust also has responsibilities to report certain incidents to other regulators such as the Education and Skills Funding Agency. Section 7 below covers these reporting obligations.

2 Immediate action following a data breach (see Appendix 6)

- Inform The Headteacher for a data breach related to individual schools and the Head of Operations for all other data breaches.
- The Headteacher will always inform the Head of Operations if they have had a suspected or actual data breach in their school.
- Identify what personal data is at risk.
- Take measures to prevent the breach from worsening e.g. changing password/access codes, removing an email from pupils' inboxes which was sent by mistake.
- Recover any of the compromised personal data e.g. use back-ups to restore data.
- Consider whether outside agencies need to be informed as a matter of urgency e.g. the police in the event of a burglary or Children's Services where the breach may lead to serious harm being caused to a pupil.
- Consider whether any affected individuals will be told about the breach straight away. For example, so that they may take action to protect themselves or because they would find out about the breach from another source. Please note this is different to the mandatory notification to individuals covered at 7.6 - 7.10 below which does not need to be an immediate notification.

3 What is a data breach?

3.1 A data breach is a breach of security which leads to any of the following:

- 3.1.1 the loss of personal data;
- 3.1.2 the accidental or unlawful destruction of personal data;
- 3.1.3 the disclosure of personal data to an unauthorised third party;
- 3.1.4 the unlawful or accidental alteration of personal data; or
- 3.1.5 unauthorised access to personal data.

3.2 Personal data is information:

- 3.2.1 from which a person can be identified (either from the information itself or when combined with other information likely to be used to identify the person); and
- 3.2.2 which relates to that person.

3.3 The following are examples of personal data held by the Trust:

- 3.3.1 names and contact details of pupils, parents and staff;
- 3.3.2 financial information about parents and staff;
- 3.3.3 pupil exam results;
- 3.3.4 safeguarding information about a particular family;
- 3.3.5 information about pupil behaviour and attainment; and
- 3.3.6 a pupil or staff member's medical information.

3.4 If staff are in any doubt as to whether an incident constitutes a data breach they must speak to the Headteacher if this relates to schools, or the Head of Operations, if this relates to CMAT personnel / Board members, who are not school based. Contact will be made immediately.

3.5 Please see Appendix 1 for examples of data breaches.

4 Roles and responsibilities

4.1 Data Breach Response

<u>Role</u>	<u>Responsibility</u>
Headteacher (relating to school based breaches)	<ul style="list-style-type: none">• responsible for co-ordinating an initial response to any school based breach.• will lead on any physical security measures which are required at the school site to contain the breach.

	<ul style="list-style-type: none"> • responsible for any communications with pupils and parents and for any pupil welfare or disciplinary considerations. • will lead on any employee welfare or disciplinary issues • responsible for ensuring the security of the schools' ICT infrastructure. In addition, for taking any possible technical measures to recover personal data or to contain a data breach. • Responsible for informing the CMAT Head of Operations.
Head of operations for CMAT	<ul style="list-style-type: none"> • responsible for co-ordinating the Trust's initial response to any breach that involves non-school based staff. • will lead on any physical security measures which are required within the Trust offices etc to contain the breach. • will lead on any employee welfare or disciplinary issues involving Trust Officers, Trust consultancy and Trust Board members • responsible for ensuring the security of Trust based ICT infrastructure. In addition, for taking any possible technical measures to recover personal data or to contain a data breach. • responsible for notifying and liaising with the Trust's insurers re school based and Central Trust team matters as required. • Responsible for liaising with the Trust's Data Protection officer. • responsible for liaising with the Board of Trustees as appropriate. • Any decision to involve the Data Protection Officer at school / central services level will be taken in liaison with the Trust CEO.
Data Protection Officer	<ul style="list-style-type: none"> • responsibility for the investigation of any data breach • The DPO will investigate the report, and determine whether a breach has occurred. To decide, the DPO will consider whether personal data has been accidentally or unlawfully: <ul style="list-style-type: none"> – Lost – Stolen – Destroyed – Altered – Disclosed or made available where it should not have been – Made available to unauthorised people

- The DPO, in liaison with the Headteacher and Head of Operations will make all reasonable efforts to contain and minimise the impact of the breach, assisted by relevant staff members or data processors where necessary.
- The DPO will assess the potential consequences, based on how serious they are, and how likely they are to happen.
- The DPO will work out whether the breach must be reported to the ICO. This must be judged on a case-by-case basis. To decide, the DPO will consider whether the breach is likely to negatively affect people's rights and freedoms, and cause them any physical, material or non-material damage (e.g. emotional distress), including through:
 - Loss of control over their data
 - Discrimination
 - Identify theft or fraud
 - Financial loss
 - Unauthorised reversal of pseudonymisation (for example, key-coding)
 - Damage to reputation
 - Loss of confidentiality
 - Any other significant economic or social disadvantage to the individual(s) concerned

If it's likely that there will be a risk to people's rights and freedoms, the DPO must notify the ICO.
- The DPO will document the decision (either way), in case it is challenged at a later date by the ICO or an individual affected by the breach. Documented decisions are stored electronically by the DPO
- Where the ICO must be notified, the DPO will do this via the 'report a breach' page of the ICO website within 72 hours. As required, the DPO will set out:
 - A description of the nature of the personal data breach including, where possible:
 - The categories and approximate number of individuals concerned
 - The categories and approximate number of personal data records concerned
 - The name and contact details of the DPO
 - A description of the likely consequences of the personal data breach

- A description of the measures that have been, or will be taken, to deal with the breach and mitigate any possible adverse effects on the individual(s) concerned.
- If all the above details are not yet known, the DPO will report as much as they can within 72 hours. The report will explain that there is a delay, the reasons why, and when the DPO expects to have further information. The DPO will submit the remaining information as soon as possible.
- The DPO will also assess the risk to individuals, again based on the severity and likelihood of potential or actual impact. If the risk is high, the DPO will promptly inform, in writing, all individuals whose personal data has been breached. This notification will set out:
 - The name and contact details of the DPO.
 - A description of the likely consequences of the personal data breach.
 - A description of the measures that have been, or will be, taken to deal with the data breach and mitigate any possible adverse effects on the individual(s) concerned.
- The DPO will notify any relevant third parties who can help mitigate the loss to individuals – for example, the police, insurers, banks or credit card companies.
- The DPO will document each breach, irrespective of whether it is reported to the ICO. For each breach, this record will include the:
 - Facts and cause
 - Effects
 - Action taken to contain it and ensure it does not happen again (such as establishing more robust processes or providing further training for individuals)

Records of all breaches will be stored by the DPO.

The DPO and headteacher will meet to review what happened and how it can be stopped from happening again. This meeting will happen as soon as reasonably possible.

5 **Containment and recovery**

- 5.1 As soon as a data breach has been identified or is suspected, steps must be taken to recover any personal data and to contain the breach. For example, the Trust may need to:
- 5.1.1 change any passwords and access codes which may have been compromised;
 - 5.1.2 if appropriate in all the circumstances, tell employees to notify their bank if financial information has been lost (or other information which could lead to financial fraud) and offer credit protection;
 - 5.1.3 limit staff and/or pupil access to certain areas of the Trust's IT network;
 - 5.1.4 use back-up tapes to restore lost or damaged data;
 - 5.1.5 take any measures to recover physical assets e.g. notifying the police or contacting third parties who may have found the property;
 - 5.1.6 notify its insurers; and
 - 5.1.7 take action to mitigate any loss.
- 5.2 The Headteacher or Head of Operations will decide what action is necessary and who will be responsible for the different aspects of containment and recovery. Where appropriate they will delegate tasks to other members of staff with the relevant expertise.
- 5.3 The Headteacher will always liaise with the Head of Operations who will seek assistance from outside experts if appropriate to effectively contain the breach and recover any personal data. For example, legal advice, reputation management advice or specialist technical advice.
- 5.4 Headteachers will never contact the DPO directly. They will always liaise with the Head of Operations who will contact the DPO as appropriate.

6 **Establishing and assessing the risks**

- 6.1 The next stage in the process of dealing with a data breach is to establish and assess the risks presented by the breach. To assist with this process, the Headteacher / Head of operations or DPO will document the answers to the questions contained in 0 in as much detail as possible.
- 6.2 The table in 0 will be copied into a new document in order to retain a record of this process.

7 **Notification**

Notification to the Information Commissioner's Office

- 7.1 From 25 May 2018 the Trust will be required to report a data breach to the ICO unless the breach is unlikely to result in a risk to the rights and freedoms of individuals. The exercise which was documented under section 0 above will be used to determine if a notification to the ICO is required. Headteachers will never report a matter to the ICO. Decisions here will always be made by the Head of Operations in liaison with the DPO.

- 7.2 "Risk to the Rights and freedoms of individuals" will be interpreted broadly. Please see row 5 of 0.
- 7.3 Any decision to not notify the ICO will be documented. It is possible that if another data breach occurs in the future that the ICO will ask why any previous breaches were not reported and the ICO is likely to ask to see evidence of any decision to not notify.
- 7.4 If the Trust decides to notify the ICO then this must be done without undue delay and where feasible within 72 hours of having become aware of the breach.
- 7.5 **Content of the notification**
- 7.5.1 The ICO has set out procedures for notifications on their website (ico.org.uk) which will be followed.
- (a) However, the Trust will also prepare a letter to the ICO in addition to following the ICO's procedures on the website in all but the most minor breaches because this provides the opportunity to present what has happened in a way that is advantageous to the Trust.
 - (b) The Trust may need to send this letter after the initial notification to incorporate any subsequent action taken by the Trust which may act in mitigation against ICO enforcement action.
- 7.5.2 The notification must contain as a minimum:
- (a) a description of the nature of the data breach including where possible:
 - (i) the categories and approximate number of data subjects concerned; and
 - (ii) the categories and approximate number of personal data records concerned.
 - (b) the name and contact details of the DPO who can provide more information to the ICO if required;
 - (c) a description of the likely consequences of the data breach;
 - (d) a description of the measures taken or proposed to be taken by the Trust to address the data breach, including, where appropriate, measures to mitigate its possible adverse effects.
- 7.5.3 If it has not been possible to submit the notification to the ICO within 72 hours of becoming aware of the breach, the notification must explain the reason for this delay. For example, that the Trust has been instructed by the police to postpone the notification to the ICO.
- 7.5.4 If it is not possible to provide all of the information at the same time, the Trust will provide the information to the ICO in phases without further undue delay. For example, the Trust could make an initial notification within the 72 hour period with a more detailed response the following week once the Trust has more information on what happened.
- 7.5.5 The initial notification will include points such as the possible cause of the breach and how the Trust plans to deal with the breach including mitigation actions.

- 7.5.6 The more detailed response will set out as clearly as possible the steps the Trust has taken to prevent a reoccurrence. The ICO is less likely to take enforcement action if it considers that the Trust has already taken steps to address what went wrong.

Contacting affected individuals

- 7.6 The Trust is required by the GDPR to report a data breach to the individuals whose data has been compromised (known as data subjects) where the breach is likely to result in a high risk to the rights and freedoms of individuals. It may not always be clear which individuals will be notified, for example, parents may need to be notified rather than their children.
- 7.7 The Trust will use the exercise at section 0 above to assist with this decision. A notification does not need to be made where:
- 7.7.1 the Trust had taken measures so that the data compromised was unintelligible to any person not authorised to access it (e.g. it was encrypted); or
- 7.7.2 the Trust has managed to contain the breach or take mitigating action so that any high risk to individuals is no longer likely to materialise (e.g. an unencrypted memory stick has been recovered before anyone was able to access the data held on it).
- 7.8 If the Trust decides not to notify individuals this decision must be documented.
- 7.9 If a notification is sent this must be done so without undue delay. The Trust will work with the ICO in determining when is the most appropriate time to notify the individuals. Other outside agencies, such as the police, may also have a view regarding the timing of this notification.
- 7.10 The ICO may advise or require the Trust to notify individuals. In addition, the ICO has the authority to require a more detailed notification to be given to individuals. The ICO is given these powers under the GDPR.
- 7.11 **Content of the notification to individuals**
- 7.12 The notification to individuals must include the following as a minimum:
- 7.12.1 the name and contact details of the DPO who can provide more information;
- 7.12.2 a description of the likely consequences of the data breach; and
- 7.12.3 a description of the measures taken or proposed to be taken by the Trust to address the data breach, including, where appropriate, measures to mitigate its possible adverse effects.
- 7.13 In addition, the Trust must consider if any additional information would be helpful to data subjects. For example, instructions on measures which they can take to protect their data now or in the future.
- 7.14 The notification must be drafted in clear language. If directed at pupils the notification will be age appropriate.
- 7.15 The Committee will decide what is the most appropriate method of communication for the notification. Factors to consider include the urgency of the notification. For example, it may be appropriate to telephone individuals followed up with an email.

Serious Incident Report to the Education and Skills Funding Agency

- 7.16 An academy trust's funding agreement makes it clear that the Charity Commission's guidance on serious incident reporting must be followed by academies and, accordingly, that serious incidents will be reported to the Education and Skills Funding Agency, as the principal regulator of academies, as soon as possible. Where there has been a data breach, the CEO will need to consider whether to make a serious incident report to the Education and Skills Funding Agency.
- 7.17 The CEO will consider the Charity Commission's [guidance on reporting serious incidents](#) and in particular, the examples of what to report in the "Data breaches or loss" section of their [table of examples](#).
- 7.18 The Education and Skills Funding Agency has extensive information sharing powers with other regulators, like the ICO, so the Education and Skills Funding Agency may be aware if a serious incident report is not made. This does not absolve the CEO of the obligation to make a serious incident report, rather it increases the likelihood of the Education and Skills Funding Agency detecting a failure to do so.
- 7.19 Because of the breadth of the Charity Commission's criteria for making serious incident reports, the CEO will consider whether to make a report in light of the data breach and surrounding circumstances - even where it has not been necessary to notify the ICO.

Notification to the police

- 7.20 The Trust will consider whether the police need to be notified about the data breach because it is possible that a criminal offence has been committed. However, there is no legal obligation to notify the police. The following are examples of breaches where a criminal offence may have been committed:
- 7.20.1 theft e.g. if a laptop has been stolen;
- 7.20.2 burglary;
- 7.20.3 if a staff member has shared or accessed personal data where this was not required as part of their professional duties e.g. a staff member shares information about a pupil with famous parents with the local press;
- 7.20.4 the Trust's computer network has been hacked (e.g. by a pupil or a third party).
- 7.21 Action Fraud is the national fraud and cybercrime reporting centre. It can be contacted on 0300 123 2040 or using www.actionfraud.police.uk

8 Internal Breach Register

- 8.1 The Trust is required to keep a register of all data breaches including those which do not meet the threshold to be reported. Staff will be trained to report all data breaches to allow the Trust to meet this requirement.
- 8.2 The DPO is responsible for keeping this register up to date. Appendix 5 is a copy of the proforma that will be used for this purpose.

9 Evaluation

Evaluation of the Trust's security measures

- 9.1 The Trust is obliged under the GDPR to implement technical and organisational measures to protect personal data. The Trust regularly evaluates the effectiveness of both its organisational and technical measures.
- 9.2 Organisational measures include:
 - 9.2.1 policies for staff on their data protection obligations, including when working away from the School site;
 - 9.2.2 guidance for staff on how to use specific computer applications and software securely; and
 - 9.2.3 data protection training for staff.
- 9.3 Technical measures include:
 - 9.3.1 the use of encryption;
 - 9.3.2 limiting access to certain areas of the Trust's IT network;
 - 9.3.3 firewalls and virus protection; and
 - 9.3.4 the use of backups.
- 9.4 The DPO will establish how the existing measures could be strengthened and what additional measures should be put in place to guard against future data breaches. The DPO should consider both breaches of a similar type to that which has occurred and the risk of security breaches more broadly.
- 9.5 The DPO should consider whether legal and/or technical advice is required.
- 9.6 This exercise should be undertaken promptly because the actions taken by the Trust to improve its practices will likely be taken into account by the ICO when considering if enforcement action should be taken against the Trust.
- 9.7 Key points to consider include:
 - 9.7.1 Would improvements in the training given to staff have prevented the breach or lessened the severity of the breach?
 - 9.7.2 Can measures be taken to speed up the process of staff reporting breaches?
 - 9.7.3 Does the Trust's Information Security Policy need to be revised?
 - 9.7.4 Are changes required to the School's/Trust's IT system?
 - 9.7.5 Should the School/Trust's document management system be made more robust? For example, should staff's ability to access certain documents be limited to a greater extent.
 - 9.7.6 Does the physical security of the School/Trust, particularly in areas where personal data is kept, need to be improved?

- 9.7.7 Do the Trust's remote working practices need to change?
- 9.7.8 Does the Trust need more robust procedures around staff using their own devices for School work?
- 9.7.9 Do the Trust's contracts with processors (e.g. a Cloud storage provider) need to be revised?
- 9.7.10 Does the Trust need to do more robust due diligence on its processors?
- 9.7.11 If any IT services providers were contracted by the Trust to carry out work related to information security was the service provided adequate?
- 9.8 The DPO should report the outcome of the evaluation to the relevant school Headteacher and Head of Operations of the Trust before implementing any necessary changes.

Evaluation of the Trust's response to the data breach

- 9.9 When the immediate action has been taken following the data breach, the Trust should evaluate how its initial response to the breach could have been better.
- 9.10 Key points to consider:
 - 9.10.1 Was the breach reported to the Headteacher / Head of Operations immediately? If not, what action can be taken to speed up the process of contacting a senior member of staff.
 - 9.10.2 Were all possible measures taken to recover the data promptly?
 - 9.10.3 Could more have been done to contain the breach as quickly as possible?
 - 9.10.4 If one of the Trust's processors (e.g. a payroll supplier) was either responsible for the breach, or discovered the breach, was this notified to the Trust without undue delay? If not, what measures can be put in place to improve this communication in the future?

10 **Tactical considerations**

- 10.1 The Trust should refer to Appendix 4 which outlines tactical and supplemental considerations. For example, is any pupil disciplinary action required?

11 **Monitoring and review**

- 11.1 The Head of Operations in liaison with the DPO should ensure that this policy is regularly reviewed and updated as required.
- 11.2 This policy should be reviewed following any data breach at the Trust which meets the threshold to be reported to the ICO.

Appendix 1 Examples of data breaches and the next steps

Example of breach	Containment and Recovery	Establishing and Assessing the Risks	Notification	Evaluation of the Trust's response to the data breach
<p>A staff member leaves papers containing information about pupils' academic performance on a train. The papers were not in a locked case.</p>	<p>The Trust should find out if it is possible to retrieve the papers. For example, by calling the train company's lost property department.</p>	<p>The Trust should work through the questions in 0 below.</p>	<p>If the papers are not retrieved, then this breach will need to be notified to the ICO.</p> <p>Whether a notification to the pupils and their parents is required will depend upon the nature of the personal data.</p> <p>The Trust should consult section 7 of this policy.</p>	<p>The Trust should work through sections 9.9 to Error! Reference source not found. of the policy above.</p>
<p>Ransomware locks electronic files containing personal data.</p>	<p>The Trust should have a back-up of the data and should also ensure that its systems are secured (e.g. that the ransomware has been removed).</p>	<p>The Trust should work through the questions in 0 below.</p>	<p>Depends on factors such as whether the Trust was able to recover the data and whether there is any other risk to the Trust's systems</p>	<p>The Trust should work through sections 9.9 to Error! Reference source not found. of the policy above.</p>
<p>Sending an email containing personal data to the incorrect recipient.</p>	<p>Use the recall email feature if available.</p> <p>Consider calling the unintended recipient and asking them to delete the email</p>	<p>The Trust should work through the questions in 0 below.</p>	<p>Depends on the sensitivity of any personal data contained in the email, whether the unintended recipient has agreed to delete it etc.</p>	<p>The Trust should work through sections 9.9 to Error! Reference source not found. of the policy above.</p>

Appendix 2 Establishing and Assessing the Risks Presented by the Data Breach

	<u>Question</u>	<u>Response</u>
1.	Precisely what data has been (or is thought to have been) lost, damaged or compromised?	
2.	<p>Is any of the data Critical Personal Data as defined in the Trust's Data Protection Policy for Staff and Information Security? This would be:</p> <ul style="list-style-type: none"> i. information concerning child protection matters; ii. information about serious or confidential medical conditions and information about special educational needs; iii. information concerning serious allegations made against an individual (whether or not the allegation amounts to a criminal offence and whether or not the allegation has been proved); iv. financial information (for example about parents and staff); v. information about an individual's racial or ethnic origin; and vi. political opinions; vii. religious beliefs or other beliefs of a similar nature; viii. trade union membership; ix. physical or mental health or condition; x. genetic information; xi. sexual life; 	

	<p>xii. information relating to actual or alleged criminal activity; and</p> <p>xiii. biometric information (e.g. a pupil's fingerprints following a criminal investigation).</p> <p>If any of these types of data are involved this makes the breach more serious.</p>	
3.	Who are the affected individuals e.g. staff, parents, pupils, third parties?	
4.	How many individuals have definitely been affected and how many potentially affected in a worst case scenario?	
5.	<p>What harm might be caused to individuals (not to the Trust)? The individuals do not necessarily need to be those whose personal data was involved in the breach.</p> <p>Harm should be interpreted broadly, for example to include:</p> <ul style="list-style-type: none"> (a) distress; (b) discrimination; (c) loss of confidentiality; (d) financial damage; (e) identity theft; (f) physical harm; and (g) reputational damage. 	

6.	What harm might be caused to the Trust? For example, reputational damage and financial loss.	
7.	<p>What mitigating factors may have lessened the risks presented by the breach? The following questions may assist when considering this point.</p> <ul style="list-style-type: none"><li data-bbox="322 427 1160 528">(a) Were any physical protections in place to limit the impact of the breach e.g. was the data contained in a locked case when it was lost/stolen?<li data-bbox="322 560 1196 628">(b) Were any technical protections in place e.g. was the data protected by encryption?<li data-bbox="322 660 1196 729">(c) Have measures been taken to contain the breach e.g. have banks being notified where financial information has been compromised?<li data-bbox="322 761 1227 861">(d) Have measures been taken to recover the data e.g. has lost data been found before being seen by any unauthorised party or have back-ups been used where electronic information was lost or damaged?	

Appendix 3 External advice

Legal advice

The Trust should consider taking legal advice in relation to the following. Please note that this is not an exhaustive list but should be used as a guide.

1. Determining whether to notify the ICO and the data subjects.
2. Drafting the notification to the ICO and the data subjects.
3. Drafting a serious incident report to the Education and Skills Funding Agency.
4. Any correspondence with other external agencies such as the Department for Education.
5. Any communications with the police.
6. The decision to notify the Trust's insurers.
7. Any communications with staff members, pupils and parents.
8. Any disciplinary action in relation to pupils or staff.
9. Establishing whether there is a risk that an affected individual might bring a legal claim against the Trust.

Reputation management

The Trust should consider obtaining advice regarding reputation management. This advice may be provided by solicitors or by other specialists. As above, this is not an exhaustive list but should be used as a guide.

The following circumstances in particular may require specialist advice:

1. If the data breach becomes widely known to the parental community.
2. If news of the breach becomes known outside of the Trust community.
3. If the media report on the breach or ask the Trust for a statement.
4. If the ICO take enforcement action which may become public knowledge.

Appendix 4 Tactical and supplemental considerations

This appendix should be completed to assist the Trust in checking that all issues surrounding the data breach have been considered. It is not an exhaustive list but may assist when handling the consequences of a data breach.

Supplemental issue	Considerations
Pupil welfare	
Staff welfare	
Parental complaints	
Staff disciplinary action	
Pupil disciplinary action	
Reputation management	
Risks of legal claims	
Possible ICO action	

Appendix 5 Data Breach Register

Under the GDPR we are required to keep a record of all personal data breaches even if the breach does not meet the threshold to be reported to the ICO. A copy of the table below will be used as the Trust's register. This register must be kept highly confidential and only accessed by those staff who need to use it. The ICO may request to see this register to check that the Trust is complying with its obligations under the GDPR.

The Data Protection Officer is responsible for keeping this register up to date.

Date of breach	Outline of facts	Effect of the breach	Remedial action taken	Regulatory bodies informed if any e.g. ICO

Appendix 6 – Flow diagram re actions if a breach is suspected
